# Advanced NHibernate Tips and Tricks

By

Philip Japikse

Phil.japikse@pinnsng.com

MVP, MCSD.NET, MCDBA, CSM, CSP

Principal Consultant

Pinnacle Solutions Group

# Who am I?

- ▶ Principal Consultant, Pinnacle Solutions Group
- ▶ Microsoft MVP
- ▶ MCSD, MCDBA, CSM, CSP
- ▶ Member Telerik Community Speaker Bureau
- ▶ Enterprise Application Architect
- ▶ Trainer/Mentor/Speaker
- ▶ Lead Director, Cincinnati .NET User's Group
- ▶ Founder and President, Agile Conferences, Inc
- ▶ Contributing Author –
  - [www.nplus1.org](http://www.nplus1.org)
  - “C# 2010 All In One” (Wiley)

# Agenda

- ▶ Read only properties on the model
- ▶ Custom Connection Provider
- ▶ Event Listeners
- ▶ ObservableCollections
- ▶ SQL Server Timestamp for Concurrency
- ▶ Ensuring Collections Are Initialized
- ▶ Isolating ICriterion

# Projections

- ▶ Can use Projection to create instance of different object based on query
  - Similar to LINQ to Objects
  - See sample code or this: <http://tinyurl.com/dmc8cy>
