# Telerik Extensions for ASP.NET MVC

- Built natively on top of ASP.NET MVC
- Razor-Ready (any view engine built on ASP.NET)
- Level A Accessible (W3C Web Accessibility Guidelines)
- Based on JQuery
- Built in compression and available CDN

# Licensing

- Free!
- Open Source GPL
- Support only through Community Forums

- \$999/\$1,299/\$1,999
- Yours to have and to hold (and to share)
- Dedicated Priority Support

# MVC Components

- Calendar
- ComboBox
- Date<Time>Picker
- Editor
- Grid
- Menu
- NumericTextBox
- PanelBar
- TabStrip
- TreeView
- Window

# Additional Goodness

- Predefined templates
- Web Asset Managers
  - Combine
  - Compress
  - Cache
  - Content Delivery Network
  - More...

# Using MVC Extensions

- Use Telerik MVC Application Template

OR

- Add them by hand

# Adding MVC Extensions

- Add reference to Telerik.Web.Mvc.dll
  - Choose correct MVCx Folder
  - Add Telerik MVC namespace to Web.Config
    - `<add namespace="Telerik.Web.Mvc.UI" />`
- Copy and Register Scripts
  - Copy `<install directory>\Scripts\<release>` to `$\Scripts`
  - Add Script Registrar at the end of site.master
    - `<%= Html.Telerik().ScriptRegistrar() %>`

# Adding MVC Extensions, Part 2

- Copy and Register Styles
  - Copy <install directory>\Content\<release> to \$Content
  - Add Style Registrar in the Head of Site.Master
    - <%= Html.Telerik().StyleSheetRegistrar() .DefaultGroup(group => group.Add("telerik.common.css") .Add("telerik.windows7.css")) %>
  - Combine and Compress if desired
- Start using Assets
